Breakaway Rigs

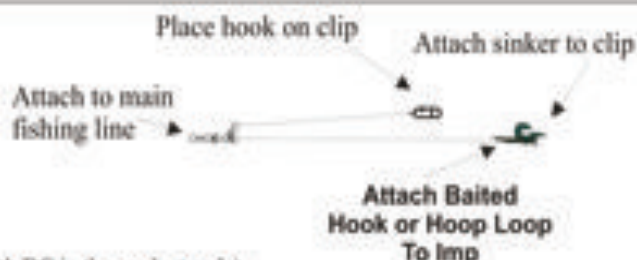

There are four different styles of our clip down rigs. All our rigs are designed so they will set the hook automatically at long distances.

Any rig with PRIG in the product code is a Pulley Rig. The leader to the sinker feeds through the eye of the swivel that attaches to the main fishing line. This rig allows considerable movement before the fish will feel the hook set.

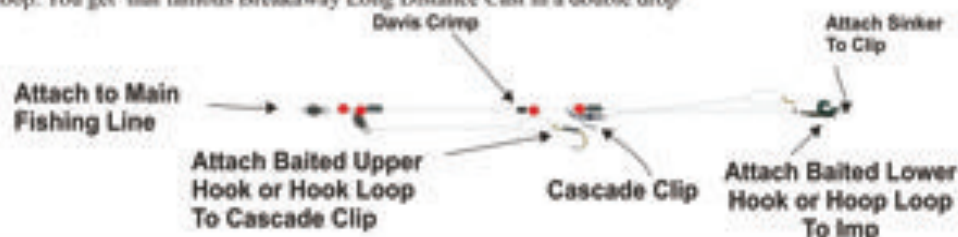

Any rig with LRFF in the product code is a Long Range Fish Finder. The fish finder element is: The trap bead for the hook leader is placed lower on the sinker leader to allow movement when the fish takes the bait.

Any rig with FOR in the product code is a Far Out Rig. The rig has a trapped hook leader. This is a better design for bottom feeding fish. The rig keeps the bait nearer the bottom.

Breakaway offers several NEW Double Drop Rigs (Any Rig with DC in the product code) for specialized applications. These new rigs provide double clip down using a lower IMP and center Cascade Clip. Adjustable Davis Crimps are provided so you can clip down the hook or the hook loop. You get that famous Breakaway Long Distance Cast in a double drop rig!

Are clip down rigs are famous for distance and catching. Depending on the design of the rig we will use an Impact Shield or IMP. Both patented Breakaway Products
